Responsibilities Added:

Within the Acute Care Division, the **Cancer Policy & Services unit** is a high-performing, demanding, fast-paced work environment, dedicated to developing and supporting strategies, policies, and legislation underpinning Alberta's acute care cancer system. Working with major health system stakeholders (e.g. Acute Care Alberta, Cancer Care Alberta, Alberta Health Services, etc.), the Unit aligns cancer care policies with government priorities and strategic directions. A key responsibility includes working with health system partners to ensure an integrated approach to ensuring cancer care policies are aligned with the Government of Alberta's mandate for the provincial health system.

This position is focused on initiatives related to cancer care system capacity and access. Work in the Unit is focused on improving patient flow within acute care facilities; improving wait times; and analyzing cancer care system capacity-related data (e.g. referral wait times, oncologist visits, readmission rates, acute care capacity).

Reporting to the Director of Cancer Policy & Services, the Manager will lead a team to oversee initiatives that improve Albertans' access to cancer care services within the provincial acute care system, including:

- Providing leadership, advice, and assistance in the Ministry's cancer care policy, strategy, and engagement efforts. This involves responding to a range of inquiries with advice that is of high quality, appropriate to the audience and timely. Requests include action requests, time-sensitive requests from Minister's Office for advice and regular reporting to committees of Cabinet and to Minister.
- Providing expert advice to the Director and Department executives on cancer care issues and policy, stakeholder groups, and administrative processes to support the unit's projects.
- Identifying and leading analysis of strategic responses for cancer care and health system issues facing the Ministry and the Government of Alberta.
- Collaborating with key stakeholders to ensure a health system-wide approach to patient access, including a focus on improving patient outcomes, reducing variability, and improving efficiency and effectiveness of cancer care service delivery.
- Establishing and maintaining positive working relationships with internal and external stakeholders, including Cancer Care Alberta, and communities and organizations, to support the development of collaborative strategies and actions to improve acute care services and achieve Ministry priorities.
- Identifying potential impacts for the health system (including cross-ministry) and stimulating innovative thinking related to acute care policy.
- Leading project teams to work collaboratively to develop and assess policy options, and support innovative initiatives enhancing access and delivery of services in hospitals.
- Engaging with stakeholders across the provincial health system and within the department to coordinate initiatives related to:
  - reducing wait times to within clinically recommended targets; and,
  - accessibility and capacity expansion, including surgical and in-patient hospital capacity.

Responsibilities Removed:

**Unit name & job title revision.**

### **Job Purpose and Organizational Context**

Why the job exists:

The Manager is responsible for leading cancer care policy development, analysis and advice to support the department's key initiatives related to cancer system capacity. They are also responsible for managing the unit's day-to-day relationships with internal/external stakeholders to ensure there is coordination across the entire continuum of care. Overall, the Manager plays a critical role overseeing their team's comprehensive research, analysis, and policy support services resulting in policy options, briefings and recommendations for consideration by the Ministry's executive leadership and the Minister.

The position leads projects critically important to the Ministry of Hospital and Surgical Health Services' mandate to ensure Albertans have access to quality care in a fiscally responsible manner and is responsible for keeping advice flowing to senior leadership within the high-performing, demanding, fast-paced work environment. These projects include cancer system initiatives related to acute care throughput and wait times initiatives and policies, review of existing and/or new legislation and regulations enabling government to accelerate the modernization of health services and other high priority cancer system initiatives involving broad engagement with clinical, operational and system stakeholders.

Operationally, the Manager leads a team of analysts/advisors, who are collectively responsible for the Ministry's high priority initiatives involving the acute care health service sector and to deliver the various policy advice and action requests of high quality and in a timely manner. This position advances the Ministry's policy and planning initiatives, and successfully complete high priority projects currently underway with Acute Care Alberta and Cancer Care Alberta (and Alberta Health Services, to an extent).

## **Responsibilities**

Job outcomes (4-6 core results), and for each outcome, 4-6 corresponding activities:

The Manager's responsibilities are to manage and coordinate a growing policy portfolio for ensuring effective access and delivery of healthcare in Alberta's hospitals.

### **Provide leadership and expertise to develop policy, strategies and actions to advance the Ministry's commitments for acute care:**

- Lead and manage research, policy and strategy development, and related activities in support of Ministry acute care health and Business Plan priorities.
- Coordinate the development and implementation of a framework for cancer care policy including supporting departmental leadership in cancer care health system capacity.
- Support effective communication strategies for significant announcements related to wait times and access.
- Coordinate issues management processes to be proactive where possible, timely, and comprehensive.
- Work with partners to coordinate work on provincial wait times and treatment improvements, and planning initiatives.
- Supports the development of communication materials to inform and educate internal and external stakeholders, including Ministerial correspondence to the general public.
- Reviews and/or prepares updates and briefings on projects for the Director, Executive Director, Assistant Deputy Minister, Associate Deputy Minister and liaises with Communications to produce briefings, announcements, etc.
- Collaborates with Unit and Divisional colleagues to ensure health standards, evidence-based practices, quality and access initiatives are incorporated into policy.
- Provides consultation and advice to internal and external stakeholders on policy in alignment with the Government of Alberta's priorities and directions for Alberta's acute care system.

### **Oversee policy development**

- Oversees policy and/or legislative reviews and/or revisions, related to cancer care priorities within the Ministry.
- Review work in Canada and internationally to understand trends, innovations, and models of care.
- Create and build networks across multiple internal and external stakeholder groups to inform the development of policy advice, strategies and research.
- Assist in data collection, analysis, and reporting on cancer care health outcomes to inform policy and strategy development, in collaboration with internal program leads and external stakeholders.
- Ensures linkages and integration of projects with other relation policy initiatives.
- Plans, organizes and participates in meetings with internal and external stakeholders.
- Participates in planning and implementation of policy working groups, forums and other related activities.

### **Manage relationships to advance key health system priorities**

- Build and sustain strategic networks with internal and external stakeholders.
- Link the health system priorities with existing initiatives in the ministry or across government.
- Represent the branch, division, or ministry on cross-ministry committees.
- Identify contacts and linkages for unit staff to follow up with to engage in their work.
- Engage executive and staff in business/operational planning, progress monitoring and evaluation, and communications.
- Collaborate with fellow branch leaders in the division to advance and deliver on the priorities of the division and to sustain information sharing and communication mechanisms.

### **Support the Director in leading unit operations to achieve strategic, business and operational goals:**

- Lead and support decisions regarding planning, coordination, and integration to move initiatives forward and develop procedural and operational frameworks for the department.
- Manage day-to-day Unit operations of direct report team members.
- Foster cross-training and professional development among team members to increase team capacity
- Support Unit budget activities
- Act on behalf of the Director, Senior Managers, Managers during vacations and absences.
- The Manager's responsibilities are to manage and coordinate a growing policy portfolio for ensuring effective access and delivery of healthcare in Alberta's hospitals.

## Problem Solving

Typical problems solved:

Problem solving occurs within broad objectives defined by Ministry priorities and strategic directions for the provincial health system. The Ministry's objectives are achieved through consultation with cross-government groups, clinicians, managers and patients; together with credible experts in acute care. A challenge in this position is the integration of emerging issues impacting existing initiatives and operations. The health system operates in a dynamic environment and remaining abreast with the changes and its implications is challenging.

The types of problems the position routinely solves, includes:

- Identifying issues related to effective collaboration with health system partners and generates ideas to create a path for how to support specific projects and coordinate them within a broad framework.
- Identifying who to engage across a large spectrum of stakeholders. There is a high requirement for creative and broad thinking/visioning, balanced with identifying related impacts to acute care policy that may need to evolve to enable the future directions.
- Appropriate framing of issues which tend to be complex and diverse, politically and publicly sensitive, spanning not only several program areas but also the entire health system, affecting significant stakeholder groups with competing needs/interests.

Types of guidance available for problem solving:

Seeks the guidance of the Director on a regular basis to support problem solving. Additionally, the incumbent should seek the experience and advice of other Managers within the department where appropriate. The Manager is encouraged to work with colleagues within the Branch to problem solve where possible and ask the Director, or Executive Director for further guidance if necessary.

Direct or indirect impacts of decisions:

The work of this position has direct and indirect impacts on the delivery of health care across the entire health system, including provincial strategies and policies that govern acute care in Alberta. The position is responsible for:

- Interacting with internal and external stakeholders to determine when stakeholders are needed to inform policy work
- Developing standard messaging for public correspondence and framing of policy advice.
- Managing policy issues relating to Alberta's acute care system and advising on how to effectively respond to issues.

## Key Relationships

Major stakeholders and purpose of interactions:

### Director/Executive Director:

- Provide advice on or respond to issues, as appropriate; provide updates/receive direction on actions; raise awareness to strategic opportunities and threats of significance to engage executive ministry attention.

Division leadership

- Collaboration, integration, advice, recommendations regarding directions, planning, and performance.

### Program Staff

- Share information, influence consideration for and adoption for acute care policy partnerships on cross-ministry research and knowledge management initiatives.
- Support unit staff skills development and professional growth.

### Other Department Staff

- Provide branch vision and priorities; information sharing, collaboration, knowledge exchange.

### Office of the Deputy Minister and Office of the Minister

- Respond to queries for advice including updates on matters for the Deputy Minister or provide briefings to Deputy Minister /Executive Committee.

### Senior Leaders at Cancer Care Alberta (and/or Acute Care Alberta)

- Share information, obtain information, collaborate, problem solve on issues related to the health system.

#### Other Jurisdictions (external)

- Obtain input, feedback on proposals, strategic directions, issues, priorities; Partnerships on provincial/national health services.

#### Required Education, Experience and Technical Competencies

Education Level	Focus/Major	2nd Major/Minor if applicable	Designation
Master's Degree	Public Administration	Other	

If other, specify:

Public health, business or public administration, or equivalent mix of related experience and education.

Job-specific experience, technical competencies, certification and/or training:

#### Education and Experience:

- A university degree is required (at a graduate level is preferred), with exposure to health policy, health care administration, research, and/or policy analysis.
- A minimum of five years' experience in policy management and/or project management.

#### Knowledge:

- Considerable experience in the health care system to understand complexity of health system issues and for achieving and maintaining credibility with counterparts in the health care delivery system and related organizations.
- Thorough knowledge of the health system in Alberta, including health care delivery, health reform and health issues; government directions.
- Demonstrated research and analytical skills with experiences in administration and/or clinical health care services.
- Considerable experience in policy analysis, development, and stakeholder consultation in government and health settings in a fast-paced, demanding environment, including in leading broad policy/legislative policy development.

#### Behavioral Competencies

Pick 4-5 representative behavioral competencies and their level.

Competency	Level					Level Definition	Examples of how this level best represents the job
	A	B	C	D	E		
Systems Thinking	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<p>Takes a long-term view towards organization's objectives and how to achieve them:</p> <ul style="list-style-type: none"> <li>• Takes holistic long-term view of challenges and opportunities</li> <li>• Anticipates outcomes and potential impacts, seeks stakeholder perspectives</li> <li>• Works towards actions and plans aligned with APS values</li> <li>• Works with others to identify areas for collaboration</li> </ul>	<p>The incumbent must understand how changes in health policy impact planning and care delivery across the care spectrum, particularly in acute care settings. Because the incumbent is responsible for the design, development and implementation of the framework for cancer care, changes can have a very large impact on key stakeholders across the health system. As such, a high degree of strategic thinking is required.</p>

Creative Problem Solving	<input type="radio"/> <input type="radio"/> <input type="radio"/> <input checked="" type="radio"/> <input type="radio"/>	<p><b>Works in open teams to share ideas and process issues:</b></p> <ul style="list-style-type: none"> <li>• Uses wide range of techniques to break down problems</li> <li>• Allows others to think creatively and voice ideas</li> <li>• Brings the right people together to solve issues</li> <li>• Identifies new solutions for the organization</li> </ul>	<p>It is critical that the incumbent understands various perspectives and is able to pull together the right people to solve complex system problems and find creative solutions. At the same time, the incumbent must balance a variety of needs, assess the implications of various alternatives and provide meaningful, well thought out solutions for consideration by department leadership.</p>
Drive for Results	<input type="radio"/> <input type="radio"/> <input type="radio"/> <input checked="" type="radio"/> <input type="radio"/>	<p><b>Works to remove barriers to outcomes, sticking to principles:</b></p> <ul style="list-style-type: none"> <li>• Forecasts and proactively addresses project challenges</li> <li>• Removes barriers to collaboration and achievement of outcomes</li> <li>• Upholds principles and confronts problems directly</li> <li>• Considers complex factors and aligns solutions with broader organization mission</li> </ul>	<p>The incumbent will be provided broad overarching recommendations and must take accountability to determine the most effective way to achieve desired result</p>
